# Adaptive Cybersecurity Solution for Protecting Shop Floor at OT

## Network Products for

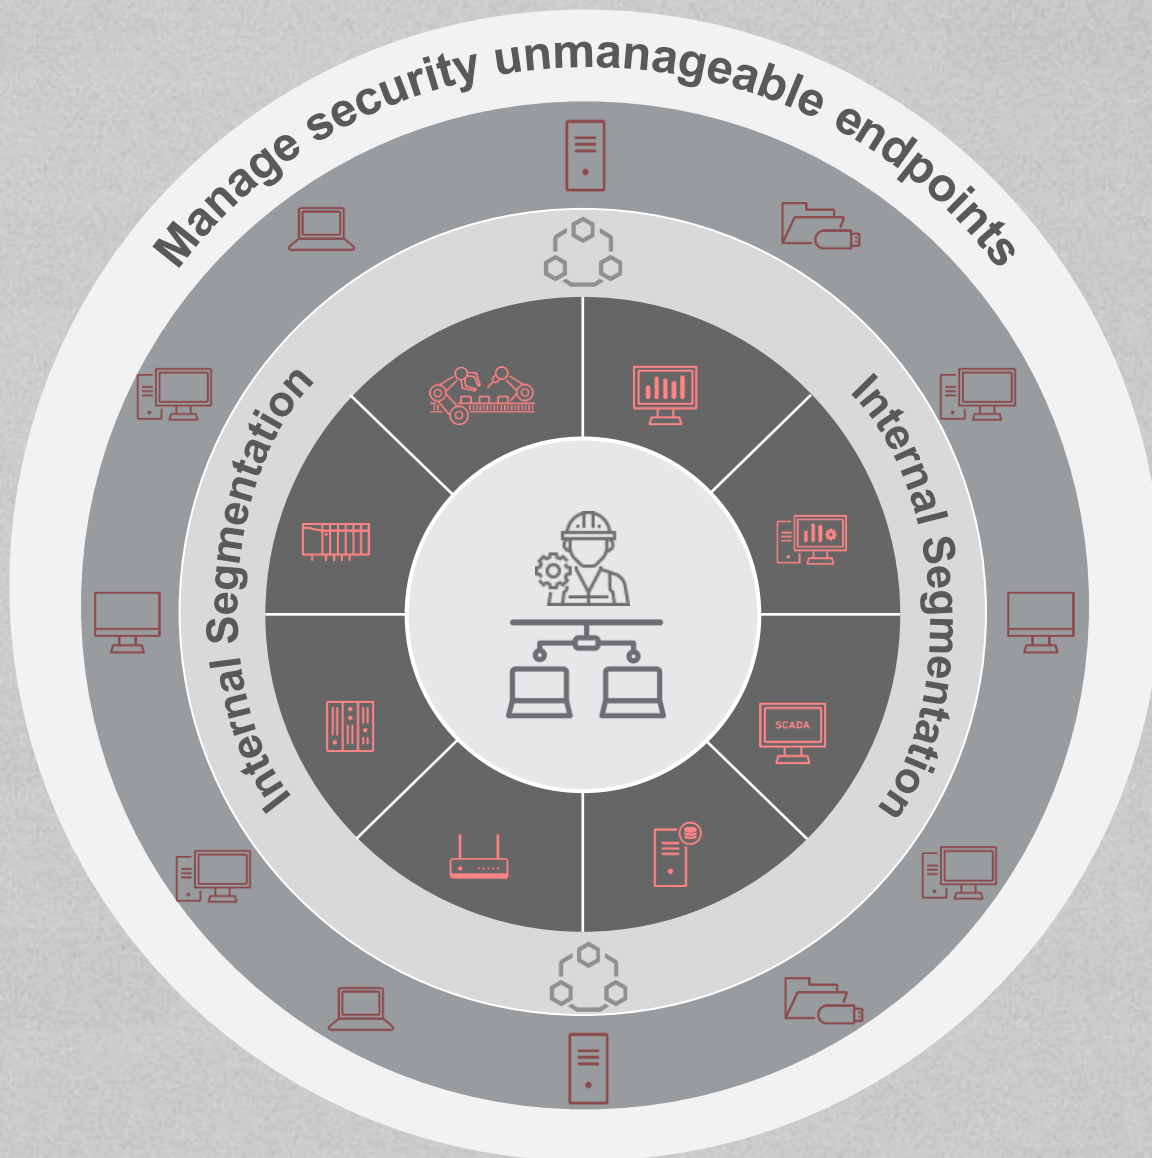

- Big flat network without proper segmentation
- Unpatched vulnerable devices
- Weak authentication and non-encrypted communication for PLC

## TXOne Solution

- **EdgeIPS and EdgeFire**
  - Internal Segmentation
    - Adaptive network deployment (EdgeIPS)
    - Zone protection w/ NAT (EdgeFire)
  - Virtual Patch
  - OT Protocol whitelisting control
- **OT Defense Console**
  - Shop floor cybersecurity management

## Endpoint Products for

Endpoints have issues to deploy conventional security countermeasures (e.g. legacy systems, limited computing resources, no Internet connectivity)

## TXOne Solution

- **ApexOne** – Traditional Windows Systems
- **Portable Security**
  - Enable security management and assets visibility by installation-less technology
  - Malware Remover
- **Stella Protect**
  - Guard critical endpoints by self defense whitelisting technology
  - Virtually no impact to system performance and memory resource

**Thank you**
